

## Disclaimer

The following report(s) provides findings from an FDA-initiated query using Sentinel. While Sentinel queries may be undertaken to assess potential medical product safety risks, they may also be initiated for various other reasons. Some examples include determining a rate or count of an identified health outcome of interest, examining medical product use, exploring the feasibility of future, more detailed analyses within Sentinel, and seeking to better understand Sentinel capabilities.

Data obtained through Sentinel are intended to complement other types of evidence such as preclinical studies, clinical trials, postmarket studies, and adverse event reports, all of which are used by FDA to inform regulatory decisions regarding medical product safety. The information contained in this report is provided as part of FDA's commitment to place knowledge acquired from Sentinel in the public domain as soon as possible. Any public health actions taken by FDA regarding products involved in Sentinel queries will continue to be communicated through existing channels.

FDA wants to emphasize that the fact that FDA has initiated a query involving a medical product and is reporting findings related to that query does not mean that FDA is suggesting health care practitioners should change their prescribing practices for the medical product or that patients taking the medical product should stop using it. Patients who have questions about the use of an identified medical product should contact their health care practitioners.

The following report contains a description of the request, request specifications, and results from the modular program run(s).

## Overview for Request: care\_mpl1r\_wp003

**Request ID:** care\_mpl1r\_wp003

**Request Description:** In this report we assessed the utilization patterns of asthma and chronic obstructive pulmonary disease (COPD) treatments in the Sentinel Distributed Database (SDD).

**Sentinel Routine Querying Module:** Cohort Identification and Descriptive Analysis (CIDA) tool, version 8.1.0, with ad hoc

**Data Source:** We distributed this request to 14 Sentinel Data Partners (DPs) on December 30, 2019. The study period included data from January 1, 2000 through July 31, 2019. Please see Appendix A for a list of dates of available data for each Data Partner.

**Study Design:** We identified individuals with prevalent use of inhaled corticosteroids mono-product (ICS), long-acting muscarinic antagonist mono-product (LAMA), ICS and long-acting beta agonist (LABA) combination product (ICS\_LABA), LABA and LAMA combination product (LABA\_LAMA), and ICS, LABA and LAMA combination product (ICS\_LABA\_LAMA). In addition, we identified individuals with incident use of interleukin 5 (IL5), azithromycin, and roflumilast. This is a Type 5 analysis in the Query Request Package (QRP) documentation.

**Exposures of Interest:** We defined the exposures of interest, ICS, LAMA, ICS\_LABA, LABA\_LAMA, ICS\_LABA\_LAMA, azithromycin, and roflumilast, using outpatient dispensing data and National Drug Codes (NDCs). We required azithromycin dispensings to have at least 14 days of supply. For IL5 exposures, we used a combination of NDCs and Healthcare Common Procedure Coding System (HCPCS) codes. We applied a washout period to identify the first valid exposure episode of incident drug use; otherwise we assessed all valid exposure episodes during the query period for prevalent drug use. Please see Appendix B for a list of generic and brand names of medical products and Appendix C for a list of HCPCS codes used to define exposures and incidence criteria in this request.

**Cohort Eligibility Criteria:** We required members to be continuously enrolled in health plans with medical and drug coverage in the 183 days prior to their index date, during which gaps in coverage of up to 45 days were allowed. We also required members to be continuously enrolled in the 365 days after their index date. The following age groups were included in the cohort: 18-64 and 65+ years.

***Pre-Index Inclusion Criteria for Diagnoses:*** We required an asthma diagnosis in the 183 days prior to the index date for cohorts 1-3 (see below); and a COPD diagnosis in the 183 days prior to the index date for cohorts 4-10 (see below).

***Pre-Index Exclusion Criteria for Diagnoses:*** We required no evidence of COPD diagnoses in the 183 days prior to and including the index date for cohorts 1-3 (see below); and no evidence of asthma diagnoses in the 183 days prior to and including the index date for cohorts 4-10 (see below). For all cohorts 1-10 (see below), we required no evidence of alpha-1-antitrypsin deficiency, sarcoidosis, cystic fibrosis, bronchiectasis, interstitial lung disease, pneumoconiosis and miscellaneous other lung diseases in the 183 days prior to and including the index date.

We formed the following ten cohort groups with distinct incidence, inclusion, and exclusion criteria as specified for each cohort:

- 1) Prevalent cohort with ICS mono-product exposures with no evidence of ICS\_LABA, ICS\_LABA\_LAMA, LABA, LAMA, LABA\_LAMA, leukotriene receptor antagonist (LTRA), cromolyn dispensings or injections, theophylline, interleukin 4 receptor (IL4R), IL5 dispensings or injections in the 365 days after and including index date; patient must have at least 2 dispensings from the above list to be excluded.
- 2) Prevalent cohort with ICS and LABA combination product exposures with no evidence of ICS, LABA, LAMA, LABA\_LAMA, ICS\_LABA\_LAMA, LTRA, cromolyn dispensings or injections, theophylline, IL4R, or IL5 dispensings or injections, in the 365 days after and including index date; patient must have at least 2 dispensings from the above list to be excluded.
- 3) Incident cohort with IL5 exposures with no evidence of IL5 dispensings or injections in the 183 days prior to the index date. Patient must also have evidence of ICS\_LABA or ICS\_LABA\_LAMA both 183 days prior to the index date and 365 days after and including the index date to be included.
- 4) Prevalent cohort with LAMA mono-product exposures with no evidence of ICS, ICS\_LABA, ICS\_LABA\_LAMA, LABA, LABA\_LAMA, roflumilast, or theophylline in the 365 days after and including index date; patient must have at least 2 dispensings from the above list to be excluded.

### Overview for Request: care\_mpl1r\_wp003

- 5) Prevalent cohort with ICS and LABA combination product exposures with no evidence of ICS, LABA, LAMA, LABA\_LAMA, ICS\_LABA\_LAMA, roflumilast, or theophylline in the 365 days after and including index date; patient must have at least 2 dispensings from the above list to be excluded.
- 6) Prevalent cohort with LABA and LAMA combination product exposures with no evidence of ICS, LABA, LAMA, ICS\_LABA, ICS\_LABA\_LAMA, roflumilast, or theophylline in the 365 days after and including index date; patient must have at least 2 dispensings from the above list to be excluded.
- 7) Prevalent cohort with ICS, LABA, and LAMA combination product exposures with no evidence of ICS, LABA, LAMA, ICS\_LABA, LABA\_LAMA, roflumilast, or theophylline in the 365 days after and including index date; patient must have at least 2 dispensings from the above list to be excluded.
- 8) Prevalent cohort with ICS and LABA combination product exposures with no evidence of roflumilast, theophylline in the 365 days after and including index date; patient must have at least 2 dispensings from the above list to be excluded. Patient must also have evidence of LAMA, LABA\_LAMA, or ICS\_LABA\_LAMA in the 365 days after and including the index date; patient must have at least 4 dispensings from the above list to be included.
- 9) Incident cohort with azithromycin exposures with at least 14 days of supply and no evidence of azithromycin dispensings with at least 14 days of supply in the 183 days prior to the index date. Patient must also have at least 14 days of supply of ICS, ICS\_LABA, ICS\_LABA\_LAMA, LABA, LABA\_LAMA, or LAMA both 183 days prior to the index date and 365 days after and including the index date.
- 10) Incident cohort with roflumilast exposures with no evidence of roflumilast dispensings in the 183 days prior to their index date. Patient must also have evidence of ICS, ICS\_LABA, ICS\_LABA\_LAMA, LABA, LABA\_LAMA, or LAMA both 183 days prior to the index date and 365 days after and including the index date.

Please see Appendix D for a list of generic and brand names of medical products, Appendix E for a list of HCPCS codes, and Appendix F for a list of International Classification of Diseases, Ninth and Tenth Revisions, Clinical Modification (ICD-9-CM and ICD-10-CM) diagnosis codes used to define inclusion and exclusion criteria in this request.

**Please see Appendix G for the specifications of parameters used in this request.**

**Limitations:** Algorithms to define exposures, incidence, inclusion and exclusion criteria are imperfect and may be misclassified. Therefore, data should be interpreted with this limitation in mind.

**Notes:** Please contact the Sentinel Operations Center ([info@sentinel-system.org](mailto:info@sentinel-system.org)) for questions and to provide comments/suggestions for future enhancements to this document. **Glossary of Terms for Analyses Using  
Cohort Identification and Descriptive Analysis (CIDA) Module\***

**Amount Supplied** - number of units (pills, tablets, vials) dispensed. Net amount per NDC per dispensing.

**Blackout Period** - number of days at the beginning of a treatment episode that events are to be ignored. If an event occurs during the blackout period, the episode is excluded.

**Care Setting** - type of medical encounter or facility where the exposure, event, or condition code was recorded. Possible care settings include: Inpatient Hospital Stay (IP), Non-Acute Institutional Stay (IS), Emergency Department (ED), Ambulatory Visit (AV), and Other Ambulatory Visit (OA). For laboratory results, possible care settings include: Emergency Department (E), Home (H), Inpatient (I), Outpatient (O), or Unknown or Missing (U). The Care Setting, along with the Principal Diagnosis Indicator (PDX), forms the Care Setting/PDX parameter.

**Ambulatory Visit (AV)** - includes visits at outpatient clinics, same-day surgeries, urgent care visits, and other same-day ambulatory hospital encounters, but excludes emergency department encounters.

**Emergency Department (ED)** - includes ED encounters that become inpatient stays (in which case inpatient stays would be a separate encounter). Excludes urgent care visits.

**Inpatient Hospital Stay (IP)** - includes all inpatient stays, same-day hospital discharges, hospital transfers, and acute hospital care where the discharge is after the admission date.

**Non-Acute Institutional Stay (IS)** - includes hospice, skilled nursing facility (SNF), rehab center, nursing home, residential, overnight non-hospital dialysis and other non-hospital stays.

**Other Ambulatory Visit (OA)** - includes other non overnight AV encounters such as hospice visits, home health visits, skilled nursing facility visits, other non-hospital visits, as well as telemedicine, telephone and email consultations.

**Charlson/Elixhauser Combined Comorbidity Score** - calculated based on comorbidities observed during a requester-defined window around the exposure episode start date (e.g., in the 183 days prior to index).

**Code Days** - the minimum number of times the diagnosis must be found during the evaluation period in order to fulfill the algorithm to identify the corresponding patient characteristic.

**Cohort Definition (drug/exposure)** - indicates how the cohort will be defined: 01: Cohort includes only the first valid treatment episode during the query period; 02: Cohort includes all valid treatment episodes during the query period; 03: Cohort includes all valid treatment episodes during the query period until an event occurs.

**Computed Start Marketing Date** - represents the first observed dispensing date among all valid users within a GROUP (scenario) within each Data Partner site.

**Days Supplied** - number of days supplied for all dispensings in qualifying treatment episodes.

**Eligible Members** - number of members eligible for an incident treatment episode (defined by the drug/exposure and event washout periods) with drug and medical coverage during the query period.

**Enrollment Gap** - number of days allowed between two consecutive enrollment periods without breaking a "continuously enrolled" sequence.

**Episodes** - treatment episodes; length of episode is determined by days supplied in one dispensing or consecutive dispensings bridged by the episode gap.

**Episode Gap** - number of days allowed between two (or more) consecutive exposures (dispensings/procedures) to be considered the same treatment episode.

**Event Deduplication** - specifies how events are counted by the Modular Program (MP) algorithm: 0: Counts all occurrences of a health outcome of interest (HOI) during an exposure episode; 1: de-duplicates occurrences of the same HOI code and code type on the same day; 2: de-duplicates occurrences of the same HOI group on the same day (e.g., de-duplicates at the group level).

**Exposure Episode Length** - number of days after exposure initiation that is considered "exposed time."

**Exposure Extension Period** - number of days post treatment period in which the outcomes/events are counted for a treatment episode. Extensions are added after any episode gaps have been bridged.

**Lookback Period** - number of days wherein a member is required to have evidence of pre-existing condition (diagnosis/procedure/drug dispensing).

**Maximum Episode Duration** - truncates exposure episodes after a requester-specified number of exposed days. Applied after any gaps are bridged and extension days added to the length of the exposure episode.

**Member-Years** - sum of all days of enrollment with medical and drug coverage in the query period preceded by an exposure washout period all divided by 365.25.

**Minimum Days Supplied** - specifies a minimum number of days in length of the days supplied for the episode to be considered.

**Minimum Episode Duration** - specifies a minimum number of days in length of the episode for it to be considered. Applied after any gaps are bridged and extension days added to the length of the exposure episode.

**Monitoring Period** - used to define time periods of interest for both sequential analysis and simple cohort characterization requests.

**Principal Diagnosis (PDX)** - diagnosis or condition established to be chiefly responsible for admission of the patient to the hospital. 'P' = principal diagnosis, 'S' = secondary diagnosis, 'X' = unspecified diagnosis, '.' = blank. Along with the Care Setting values, forms the Caresetting/PDX parameter.

**Query Period** - period in which the modular program looks for exposures and outcomes of interest.

**Switch Evaluation Step Value** - value used to differentiate evaluation step. Each switch pattern can support up to 2 evaluation steps (0 = switch pattern evaluation start; 1 = first evaluation; 2 = second evaluation).

**Switch Gap Inclusion Indicator** - indicator for whether gaps in treatment episodes that are included in a switch episode will be counted as part of the switch episode duration.

**Switch Pattern Cohort Inclusion Date** - indicates which date to use for inclusion into the switch pattern cohort of interest as well as optionally as the index date of the treatment episode initiating the switch pattern. Valid options are the product approval date, product marketing date, other requester defined date, or computed start marketing date.

**Switch Pattern Cohort Inclusion Strategy** - indicates how the switch pattern cohort inclusion date will be used: 01: used only as a switch cohort entry date. First treatment episode dispensing date is used as index for computing time to first switch; 02: used as switch cohort entry date and as initial switch step index date for computing time to first switch.

**Treatment Episode Truncation Indicator** - indicates whether the exposure episode will be truncated at the occurrence of a requester-specified code.

**Washout Period (drug/exposure)** - number of days a user is required to have no evidence of prior exposure (drug dispensing/procedure) and continuous drug and medical coverage prior to an incident treatment episode.

**Washout Period (event/outcome)** - number of days a user is required to have no evidence of a prior event (procedure/diagnosis) and continuous drug and medical coverage prior to an incident treatment episode.

**Years at Risk** - number of days supplied plus any episode gaps and exposure extension periods all divided by 365.25.

**Appendix B. List of Generic and Brand Names of Medical Products Used to Define Exposures and Incidence Criteria in this Request**

<b>Generic Name</b>	<b>Brand Name</b>
<b>Inhaled Corticosteroids (ICS) Mono-Product</b>	
budesonide	budesonide
budesonide	Pulmicort
budesonide	Pulmicort Flexhaler
fluticasone furoate	Arnuity Ellipta
fluticasone propionate	Flovent HFA
fluticasone propionate	Flovent Diskus
mometasone furoate	Asmanex Twisthaler
mometasone furoate	Asmanex HFA
beclomethasone dipropionate	Qvar
beclomethasone dipropionate	Qvar RediHaler
budesonide	Pulmicort Turbuhaler
ciclesonide	Alvesco
fluticasone propionate	ArmonAir RespiClick
<b>ICS and Long-Acting Beta Agonist (LABA) Combination Product</b>	
mometasone furoate/formoterol fumarate	Dulera
fluticasone propionate/salmeterol xinafoate	fluticasone propion-salmeterol
fluticasone propionate/salmeterol xinafoate	Advair Diskus
fluticasone propionate/salmeterol xinafoate	Advair HFA
fluticasone furoate/vilanterol trifenate	Breo Ellipta
budesonide/formoterol fumarate	Symbicort
fluticasone propionate/salmeterol xinafoate	Wixela Inhub
fluticasone propionate/salmeterol xinafoate	AirDuo RespiClick
<b>Interleukin 5 (IL5)</b>	
mepolizumab	Nucala
benralizumab	Fasenra
reslizumab	Cinqair
benralizumab	Fasenra Pen
<b>Long-Acting Muscarinic Antagonist (LAMA) Mono-Product</b>	
umeclidinium bromide	Incruse Ellipta
tiotropium bromide	Spiriva with HandiHaler
tiotropium bromide	Spiriva Respimat
glycopyrrolate	Seebri Neohaler
acridinium bromide	Tudorza Pressair
revefenacin	Yupelri
glycopyrrolate/nebulizer and accessories	Lonhala Magnair Starter
glycopyrrolate/nebulizer accessories	Lonhala Magnair Refill
<b>LABA and LAMA Combination Product</b>	
glycopyrrolate/formoterol fumarate	Bevespi Aerosphere
indacaterol maleate/glycopyrrolate	Utibron Neohaler
tiotropium bromide/olodaterol HCl	Stiolto Respimat
umeclidinium bromide/vilanterol trifenate	Anoro Ellipta
<b>ICS, LABA and LAMA Combination Product</b>	
fluticasone furoate/umeclidinium bromide/vilanterol trifenate	Trelegy Ellipta

J98.4	Other disorders of lung	Diagnosis	ICD-10-CM

**Appendix F. List of International Classification of Diseases, Ninth and Tenth Revisions, Clinical Modification (ICD-9-CM and ICD-10-CM) Diagnosis Codes Used to Define Inclusion/Exclusion Criteria in this Request**

<b>Code</b>	<b>Description</b>	<b>Code Category</b>	<b>Code Type</b>
J98.51	Mediastinitis	Diagnosis	ICD-10-CM
J98.59	Other diseases of mediastinum, not elsewhere classified	Diagnosis	ICD-10-CM
J98.6	Disorders of diaphragm	Diagnosis	ICD-10-CM
J98.8	Other specified respiratory disorders	Diagnosis	ICD-10-CM
J98.9	Respiratory disorder, unspecified	Diagnosis	ICD-10-CM
J99	Respiratory disorders in diseases classified elsewhere	Diagnosis	ICD-10-CM
M32.13	Lung involvement in systemic lupus erythematosus	Diagnosis	ICD-10-CM
M33.01	Juvenile dermatomyositis with respiratory involvement	Diagnosis	ICD-10-CM
M33.11	Other dermatomyositis with respiratory involvement	Diagnosis	ICD-10-CM
M33.21	Polymyositis with respiratory involvement	Diagnosis	ICD-10-CM
M33.91	Dermatopolymyositis, unspecified with respiratory involvement	Diagnosis	ICD-10-CM
M34.81	Systemic sclerosis with lung involvement	Diagnosis	ICD-10-CM
M35.02	Sicca syndrome with lung involvement	Diagnosis	ICD-10-CM
R06.03	Acute respiratory distress	Diagnosis	ICD-10-CM
R09.1	Pleurisy	Diagnosis	ICD-10-CM

### Appendix G. Specifications Defining Parameters for this Request

This request executed the Cohort Identification and Descriptive Analysis (CIDA) tool, version 8.1.0, to examine utilization pattern of asthma and chronic obstructive pulmonary disease (COPD) treatments in the Sentinel Distributed Database (SDD).

**Query period:** January 1, 2008 - December 31, 2019  
**Coverage requirement:** Medical and Drug  
**Pre-index enrollment requirement:** 183 days  
**Post-index enrollment requirement:** 365 days  
**Enrollment gap:** 45 days  
**Age groups:** 18-64, 65+  
**Stratifications:** Overall, sex, and age group  
**Envelope macro:** Default (Reclassify encounters during inpatient stay as inpatient)
